

CONTENTS

Key Note Address:	Page
The International Cyanide Management Code – Adoption of the Code and its Implications <i>Edward Clerk, Principal Environmental Scientist/Group Manager – Environment, Golder Associates Pty Ltd, Australia</i>	1
Upgrading, Gravity Treatment & Comminution	
Optical Sorting of Witwatersrand Gold Ores: An update – Waste Rock Dump Sorting at Goldfields; Run-Of-Mine Sorting at Central Rand Gold <i>L von Ketelhodt, CommodasUltrasort (Pty) Ltd, South Africa, LM Falcon & RMS Falcon, The University of the Witwatersrand, South Africa</i>	18
Alluvial Gold – Some Sample, Mine And Plant Considerations <i>Ken Nielsen, Kinex Pty Limited, Australia</i>	34
Leaching & Recovery	
Studies on the Recovery of Silver from Lead-Zinc Flotation Tailings <i>Michael Rohde, Pau Chieng, hrltesting Pty Ltd, Australia, Mark Runge, Rio Tinto Iron Ore, Australia, Nursen Guresin, Snowden Mining Industry Consultants Pty Ltd, Australia & N.W. (Bill) Johnson, Mineralurgy Pty Ltd, Australia</i>	53
A Non-Cyanide Route for Processing of Refractory Gold Ores and Concentrates <i>Bryn Harris & Carl White, Neomet Technologies Inc., Canada</i>	78
The Merrill Crowe Process Vs Carbon In Pulp- Process Selection <i>Damian Connelly, Mineral Engineering Technical Services Pty Ltd, Australia</i>	96
The Role of Biomineralisation Procedures and Accompanying Gold Extraction in a Range of Ores <i>Leslie C Thompson, Pintails Systems Inc. USA & Ian RF MacCulloch, CooMooRoo Energy Pty Ltd, Australia</i>	120
The Bioxidative Pretreatment of Gold Bearing Sulphide <i>Meilin Liu, Wenyan Liu, Limei Yang & Jiankang Wen, National Engineering Laboratory of Biohydrometallurgy, China</i>	128
Keys to Successful Gold Heap Leaching <i>Alan Taylor, ALTA Metallurgical Services, Australia</i>	139
Cyanide Detox & Recovery Symposium	
Ongoing Water Management Developments at Newmont Waihi Gold <i>Jennifer Meikle, Newmont Waihi Gold, New Zealand</i>	147
Fundamental Investigations Of The SO₂/Air, Peroxide And Caro's Acid Cyanide Destruction Processes <i>Paul Breuer, Coby Jeffrey & Rebecca Meakin, CSIRO Process Science and Engineering, Australia</i>	154
Comparison of The MMS Cn-D™ Cyanide Destruction Process with Caro's Acid, SMBS/Air and Hydrogen Peroxide Options <i>Mike Adams, Maelgwyn Australia Pty Ltd,</i>	168
The Effect of Process Variables on Cyanide and Copper Recovery using SART <i>Andrew Simons & Paul Breuer, CSIRO/Curtin University, Australia</i>	175
Membrane Technology For Improving The Environmental And Economic Performance of Gold Mining Operations <i>Tony Picaro & Nathan Stoitis, EcoTechnol Resources Pty Ltd, Australia</i>	188
A Review of Copper Cyanide Recovery for The Cyanidation of Copper Containing Gold Ores <i>Xianwen Dai, Andrew Simons & Paul Breuer, CSIRO Process Science & Engineering, Australia</i>	189
Cyanide Attenuation Modeling for the Newmont Golden Ridge Ltd Akyem Project <i>Michael Botz, Elbow Creek Engineering, Inc, USA & Thomas C. Logan, Newmont Mining Corporation, USA</i>	212
The Aster Process: Technology Development Through to Piloting, Demonstration and Commercialization <i>Craig van Buuren, Nobuzwe Makhotla and Johan Waldemar Olivier, Gold Fields Limited, South Africa</i>	226
