

CONTENTS

Key Note Address:	Page
Leaching of Uranium Minerals: Challenges and Research Opportunities <i>Prof. Suresh K. Bhargava, Associate Pro Vice-Chancellor (International) - College of Science, Engineering and Health, RMIT University, Australia</i>	1
Project Development	
Geometallurgy and Processing of Australia's Uranium Deposits <i>Mark Pownceby, Hal Aral and Ralph Hackl, CSIRO Process Science and Engineering and Minerals Down Under National Research Flagship, Australia</i>	27
Uranium Department Studies: Beyond the Assay <i>Brandon Youlton, Louis Coetzee, Lisa Scott & Johan O' Connell, SGS, South Africa, Ronel O' Connell, AngloGold Ashanti & Judith Kinnaird, University of the Witwatersrand, South Africa</i>	43
Uranium Project Development – Adopting the Right Approach <i>Alan Taylor, ALTA Metallurgical Services, Australia</i>	56
SX/IX/Refining	
A Review Of Uranium Solvent Extraction: Its Present Status And Future Trends <i>Zhaowu Zhu & Chu Yong Cheng, Parker Centre / CSIRO Process Science and Engineering / CSIRO Minerals Down Under National Research Flagship, Australia</i>	80
Sonochemical Ion Exchange in RIP System <i>Chul-Ju Kim, Kyeong Woo Chung & Ho-Sung Yoon, Korea Institute of Geoscience and Mineral Resources, Korea</i>	97
Operation of a Resin-In-Pulp (RIP) Demonstration Plant for Recovering Uranium from a South African Gold Pulp <i>Derrin Auerswald, Bateman Engineering Projects, & Tresha Udayar, Marthie Kotze & Jaco Scheepers, Mintek, South Africa</i>	103
What are the Options for an Integrated IX Process to Recover Uranium from Saline and Hypersaline Liquors? <i>Abigail Wilson, Marina Fainerman-Melnikova & Karin Soldenhof, Australian Nuclear Science and Technology Organisation, Australia</i>	116
Investigations into the Recovery of Uranium from Liquors Containing High Chloride Concentrations from an IX Perspective (Abstract Only) <i>Areski Rezkallah & Cushla Connolly, The Dow Chemical Company, Australia</i>	127
The Clean TeQ U-HiSAL™ Process: Extraction of Uranium from Acidic Saline Environments <i>John Carr, Tony Chamberlain & Nikolai Zontov, Clean TeQ Ltd, Australia</i>	128
Modelling Approach for a Precipitation Process – Application to The Tetravalent Uranium Oxalate Precipitation <i>Murielle Bertrand, Olivier Lebaigue & Frédéric Ducros, French Alternative Energies and Atomic Energy Commission, Edouard Plasari, National Center for Scientific Research, & Nicolas Lamarque, European Center for Research and Advanced Training in Scientific Computation Researches, France</i>	137
Process Plant Design	
Designing Uranium Plants <i>Chris Panaou, Hatch Associates Pty Ltd, Australia, & Mark Bellino, Hatch Associates Pty Ltd, Canada</i>	149
Alternative Method for Determining Yield Stress of a Calcrete-Hosted Uranium Ore <i>Laura Kuhar, Nicole Botsis, Byron Benvie, Nicole Turner & Karl Bunney, Parker CRC for Integrated Hydrometallurgy Solutions, CSIRO Minerals Down Under National Research Flagship, Australia</i>	166
Uranium Ore Leaching Processes Forum	
Review of Uranium Ore Leaching Systems <i>Alan Taylor, ALTA Metallurgical Services, Australia</i>	179
Pilot Plant Scale Up Of Uranium Leach Applications <i>Bill Baguley, Mixtec, Australia</i>	192
Sonochemical Leaching of Low Grade Uranium Ore <i>Kyeong Woo Chung, Chul-Ju Kim & Ho-Sung Yoon, Korea Institute of Geoscience and Mineral Resources, Korea</i>	200
Direct Solvent Leaching of Uranium and REEs from El-Hammamat Mineralization by Di-2-Ethylhexyl Phosphoric Acid <i>K. F. Mahmoud, M. M Ali, N. M. T El-Hazek & A. E. M Hussein, Nuclear Materials Authority, M. A. Mousa, Benha University, Egypt</i>	207
